Resources

Where can I get resources?

You can start by visiting my resouRces website.

The screenshot shows a web browser displaying the 'resouRces: Database of Resources to Learn & Teach R' website. The page features a sidebar with links to 'About resouRces', 'Topics', and 'Extra'. The main content area is a grid of cards, each representing a topic: Art, Dashboards/Shiny, Data Science, Datasets, Docker, Eye-Tracking, From R to Python, GIT, Learning R, Machine Learning, and Making Websites/Blogs. Each card includes icons for 'All Resources', 'E-books Only', 'Blogs/Slides Only', and 'Courses/Tutorials Only'.

You can visit the Rstudio Education site:
<https://education.rstudio.com/learn/beginner/>

The screenshot shows the 'R Studio Education' website. The top navigation bar includes links for 'Blog', 'Learn', 'Teach', and 'Certify'. The main section is titled 'Beginners' and features a large, stylized illustration of a mountain made of R code blocks, with a sun, clouds, and a small figure at the base. Below the illustration, text reads: 'No one starting point will serve all beginners, but here are 6 ways to begin learning R.' A note below states: 'Install RStudio and R packages like tidyverse. These three installation steps are often...'. To the right, there are sections for 'Resources' (with a 'Cheat Sheets' card) and 'Books' (with a card for 'The RStudio team writes'). A 'Next up: Intermediates' link is also visible.

Visit Crystal Lewis' wiki: <https://github.com/Cghlewis/data-wrangling-functions>

The screenshot shows Crystal Lewis' GitHub profile page. On the left, there's a large circular profile picture of a smiling woman with dark hair, wearing a dark blue top with a floral pattern. Below the picture, her GitHub handle "Cghlewis" is displayed, along with a "Follow" button. To the right of the profile picture, her bio reads "Freelance Data Management Consultant". It also shows her follower count (52) and the number of users she follows (36). Her location is listed as "Saint Louis, MO". The main content area is titled "Cghlewis / README.md" and features the text "Hi! I'm Crystal" in white. To the right of the text is a stylized illustration of a green stem with several yellow flowers. At the top of the page, there's a navigation bar with links for "Overview", "Repositories 38", "Projects", "Packages", and "Stars 12". The "Overview" tab is currently selected. The top of the page also includes a search bar, a list of recent repositories, and various GitHub navigation icons.

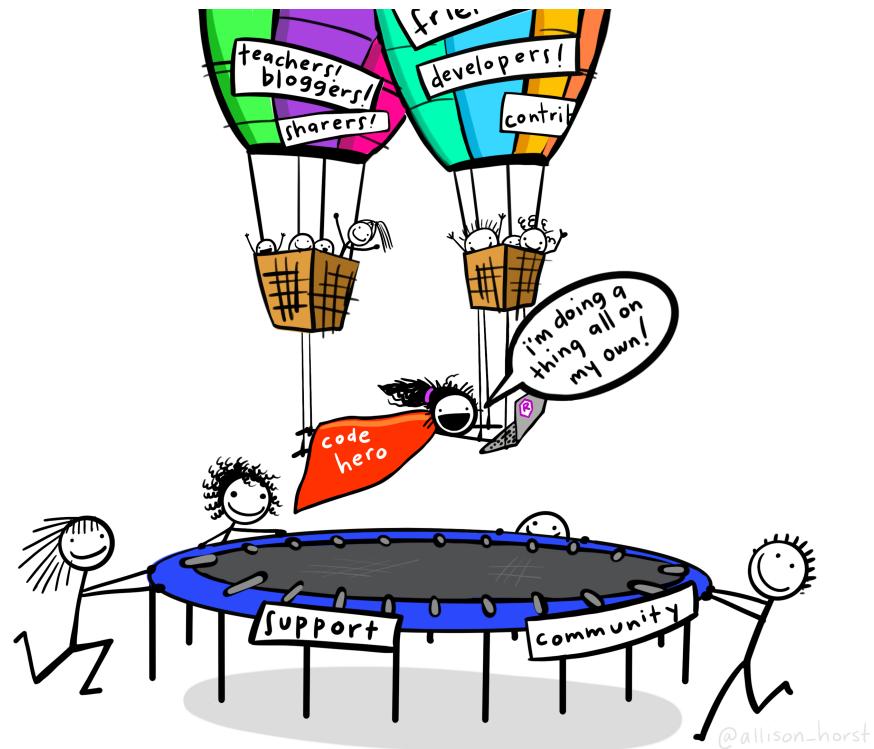

Have Fun!

It may be frustrating at first but it gets better 😅!
